About us

Indienz AB is a biotechnology company established in 2010 by researchers with long experience in basic and applied biotechnological research. It is a spin-off company from the Division of Biotechnology, at Lund University.

Indienz AB primarily focuses on industrial biotechnology. The company is well equipped with hardware and instruments to perform microbial cultivation, protein- and low molecular weight substance production, downstream processing, biocatalysis, freeze-drying, etc.

In Indienz 700 m² facility located at Anneberg farm in Billeberga (25 km from Lund), Indienz effectively handle target processes from a few milliliters up to >20 m³.

Objective

Biotech companies aim to shorten their lab-to-market time, streamline their processes, minimize costs, improve profitability, stay competitive and surpass regulatory and quality demands.

These are challenging tasks but can be addressed effectively and this is where Indienz AB can be part of the solution.
